Feline Senior Cat Wellness Program

Annually:	Biochemistry/Complete Blood Count/Urinalysis every 1-2 years beginning at 8 years of age
	Thyroid function assessment every 1-2 years
	Tonopen evaluation for glaucoma (increased eye pressures)
	ECG evaluation for heart arrhythmias (abnormal heartbeats)
	Blood pressure determination – one of the early indications of kidney or thyroid disorders in cats can be increased blood pressure
	Thoracic (chest) radiographs to evaluate the heart and to check for the presence of lung tumors

Crater Animal Clinic strives to help keep our patients happy and healthy throughout their lives. Annual wellness examinations and preventative care are the best methods for helping us keep your pets healthy and to identify any potential illness or condition early before your pet begins to show symptoms. When caught early, many of these conditions can be effectively managed by medication, dietary management or supplementation. By taking a preventative approach, you provide your pet with the best chance of a long, happy, healthy life! Call us to schedule a wellness exam today.

A wellness exam is a thorough physical exam aimed at assessing the overall health and quality of life of your pet. This exam includes a thorough dental exam, complete physical exam, brief orthopedic exam and assessment of your pet's nutritional status, body condition and more. This exam allows us to help your determine your animal's optimal care and to identify any problems or illnesses before they become an issue.
