Canine Adult Wellness Program

The following guidelines are our general recommendations for preventative health for your dog. Because each animal is unique, we will tailor your pet's health program as needed for optimal care.

Annual Care:	Wellness examination
	Dental examination (with dental cleaning and prophylaxis as required)
	Leptospirosis vaccination
	Bordatella (Kennel Cough) vaccination: if boarding or high-risk environments
	Deworming: We recommend bringing in a fecal sample yearly; dogs can carry parasites without showing signs, some of which can be transmitted to people or children.
	Nutrition/activity consult and body condition evaluation
	none
Every 2 Years:	Heartworm test beginning at 1 year of age. Being on heartworm preventative medication all year round is highly recommended, and testing is to be sure the preventative is working.
	none
Every 3 Years:	Rabies vaccination
	DHPP vaccination: Distemper Virus, Canine Hepatitis Virus, Parvo Virus and Parainfluenza Virus

Crater Animal Clinic strives to help keep our patients happy and healthy throughout their lives. Annual wellness examinations and preventative care are the best methods for helping us keep your pets healthy and to identify any potential illness or condition early before your pet begins to show symptoms. When caught early, many of these conditions can be effectively managed by medication, dietary management or supplementation. By taking a preventative approach, you provide your pet with the best chance of a long, happy, healthy life! Call us to schedule a wellness exam today.
